

9. Miscellaneous services

Maintaining workspace consistency

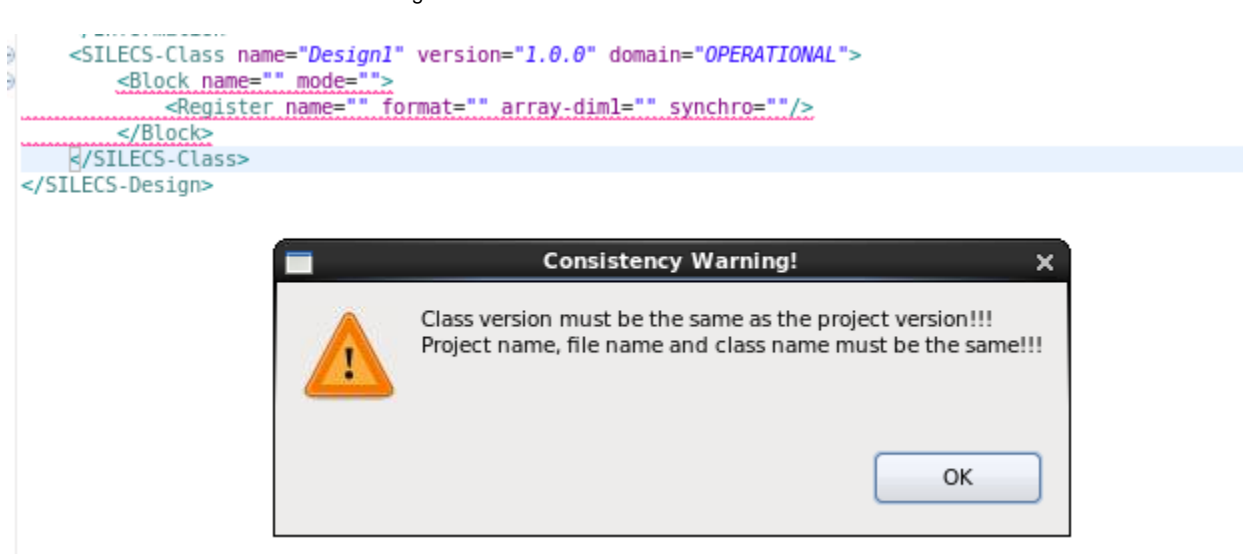

1. It is forbidden to rename project files in the project explorer.

User cannot change Design/Deploy version in the editor

2. When user tries to save the document changes are reverted:

Editor in read-only mode

If the user is not listed as Owner or Editor in deploy or design document he/she cannot modify it.

```

    <Owner user-login="otherUser"/>
    <Editor user-login="ieplcop"/>
  </Information>
  <SILECS-Class name="Design1" version="1.0.0" domain="OPERATIONAL">
    <Block name="" mode="myChanges">
      <Register name="" format="" array-dim1="" synchro=""/>
    </Block>
  </SILECS-Class>
</SILECS-Design>

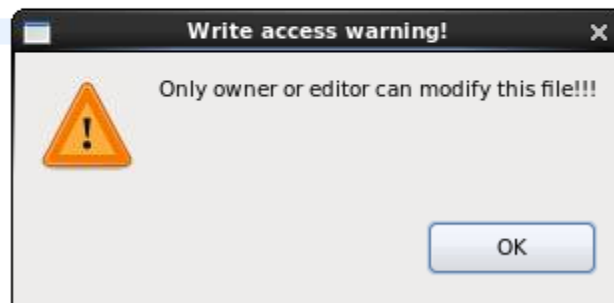

```

All changes are reverted the document is saved:

```

    <Owner user-login="otherUser"/>
    <Editor user-login="ieplcop"/>
  </Information>
  <SILECS-Class name="Design1" version="1.0.0" domain="OPERATIONAL">
    <Block name="" mode="">
      <Register name="" format="" array-dim1="" synchro=""/>
    </Block>
  </SILECS-Class>
</SILECS-Design>

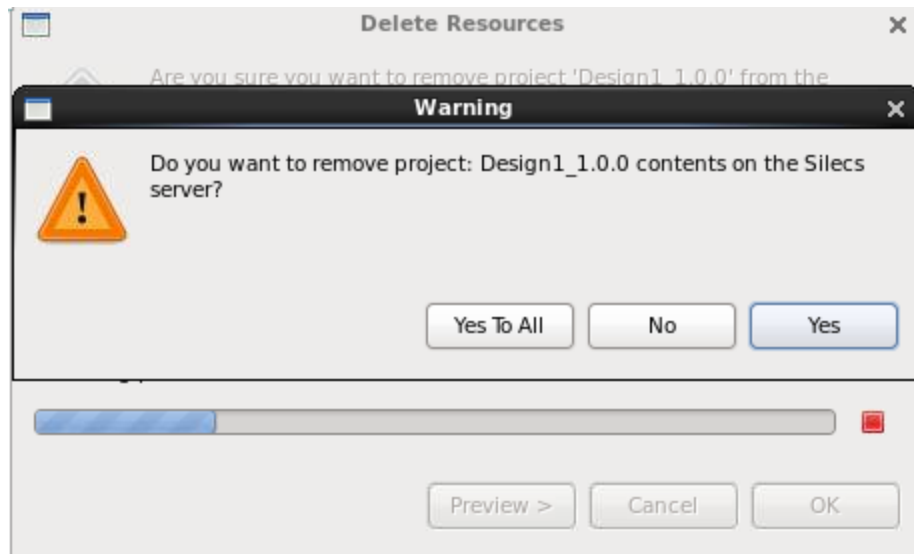

```

Removing a project form Silecs server - deleting a project.

Owner of a silecs document has a possibility to remove the project from silecs server.

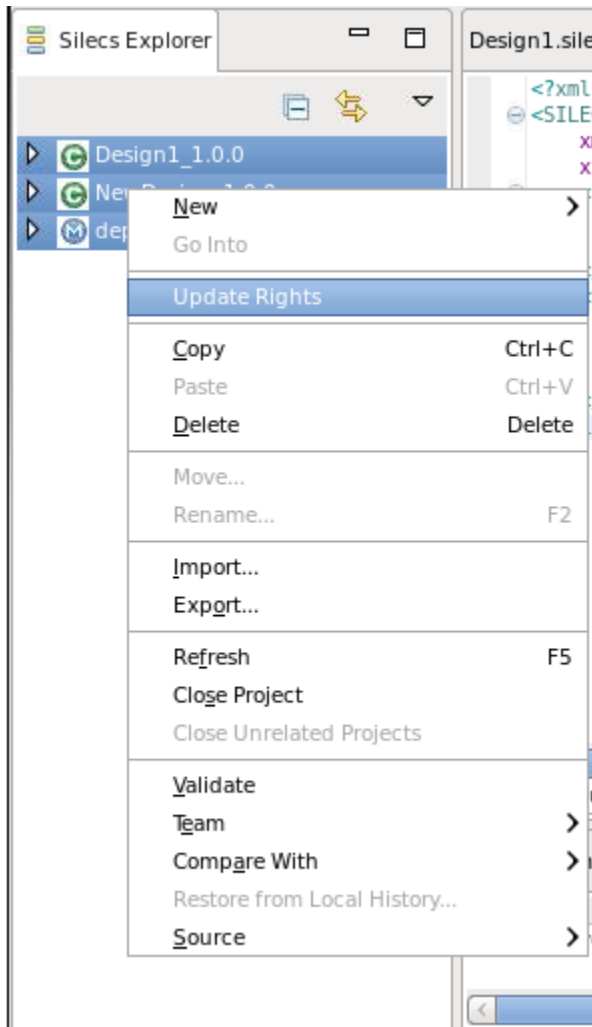

Popup window appears every time user deletes a project.

*Technically an email is send to silecs-support with request to delete the document.

Updating rights

To update rights without generating client resources user can select multiple project in the workspace and use Update Rights command from popup menu.

Console output

Project Explorer

To expand the project just double-click on it.

To expand selected projects use

-CTRL + SHIFT + A shortcut
